helps migrant farm-workers and their families attain their high school equivalency and transition to higher education, vocational/technical training, military, or improved employment. HEP at Hartnell has continually met and exceeded the target of graduating at least 70% of students every year. The latest proposal includes non-credit HSE courses designed to assist with the growing budgetary needs of the grant.

\$3,000,000
AWARDED
5 year term

- Hartnell's proposal focused on increasing the range and capacity of transfer, career, and job placement services to Hartnell students. The project will expand the current Career and Transfer Center to reach more students across more majors throughout different locations (e.g. at Alisal, King City, future Soledad and North Monterey County centers) through increases in personnel and innovative technology.

- to increase retention and graduation rates of undergraduate students pursuing AA/BA degrees in STEM fields. The project focuses on providing flexible, short-term applied learning/research opportunities to students that might not otherwise be able to pursue full-time internships, in order to better prepare them for future education and careers in the field. The project will train faculty via workshops and partner with a research non-profit to study the impact of these activities.

The California Space Grant Consortium (CaSGC) has invited Hartnell College to participate in the 2022 Space Grant Opportunity for Community College Partnerships. Each funded proposal is expected to increase the understanding, assessment, development, and utilization of space and aeronautics resources. The goals are to enhance the STEM preparation at California Community Colleges, resulting in increased graduation rates and greater campus enrollments in STEM disciplines and to improve a bridge opportunity for a maximum of 12 students per campus to a STEM major at a four-year university.

\$500,500
Applied

encourages transformative projects that address immediate challenges facing STEM education at two-year colleges. This is a collaborative grant proposal, led by City College of San Francisco, with Hartnell and Butte Colleges, about the "Optimizing STEM Students" program to advance a holistic approach to STEM education by providing institutions, instructors, and students program elements designed to expand and empower the facilitation of learning through the active application of cognitive and affective skills. Central to the approach is strengthening the education-to-workforce pathways to STEM careers.
