

5th ANNUAL STUDENT SUCCESS CONFERENCE FEEDBACK 01/20/16

EARLY SUPPORT PROGRAM: MARK SANCHEZ

1. Accessing paws to document student issue was new to me and I would like to learn more about this
2. I signed up!
3. Great incentive for faculty to help keep students on track.
4. Great programs. Thank you.
5. Greatstuff, will use.
6. This was an excellent presentation about a resource that I didn't even know existed. It would be great to get regular updates of the success of this program.
7. Informative and helpful!
8. Excellent presentation. Good speaking points and interaco5a10.26.5767.

NOT ROTTEN TO THE CORE FROM APPLES TO EQUIKYMENDELSON & A. ALARCON

1. Good discussion.
2. Great presentation and discussion.
3. Excellent.
4. This was a good introduction. More communication needs to be done about student.
5. Presentation began with good conceptual demonstration clarifying equity vs. equality. However, it proceeded to discuss hidden biases but instead became discussions/storming equity activities.
6. A different room would have helped with discussion.
7. Helpful to know what might be available to our students someday.
8. Need more scenarios and examples of how to improve equity.
9. Great.
10. Need laptop that has wifi connection that reaches left back end of room. Content is really good.

INTRODUCTION TO CANVAS LARK

1. Not enough computers out. Very useful.
2. Presentation somewhat random. High content, will use in fall/summer. Can't learn in this format.
3. Laura does a superb job explaining and fielding faculty questions! A+.
4. This was very informative. Unfortunately, I didn't have a laptop/computer to do the work. It was also unfortunate that it was at the end of the 2nd day, in a time in which most people felt very tired.
5. Not very organized presentation. Jumped around from subject to subject without really explaining the benefits of Canvas. Need to explain why we're moving to this system, how it is better than Etudes. Why should we be happy about doing all this work?
6. Very popular session. I was able to setup canvas as instructed, but kept getting kicked off due to many people in the room using wifi. I was able to participate for the 1st hour. Brief discussion of items relevant to faculty contract. We had some time today for Dr. Wellsfry's lecture which was beneficial.
7. Wasted a lot of time trying to get people on computers. Should have a bigger room like computer lab or just an intro presentation but not trying to get everyone on computer. Have time for faculty to discuss CFA negotiations. We had a lot of discussion on voting items. This was great because everyone was there as well as union reps to answer questions. Maybe have it as a breakout session or other format.

8. Scheduling suggestion: if there's just one day between end of registration and the first day of class, don't make it a day that's completely taken up with meetings! Instructors have a lot to do in that interval.
9. I will be planning on using canvas.
10. Need more time.
11. Please have Laura Lark present anything! More on academic support centers (new labs?). Tutoring (what's available). Early support.
12. Too much content in too little time.
13. Needed more sessions of this too packed, WI, FI to slow, presenter was great! Bring in experts about teaching online. Specific to subject areas -Math.
14. The session was not appropriate for "digital immigrants". Extremely fast for me. Not clear for beginners. I am very confused.
15. Training too fast for me to keep up. Not all of us are at the same tech level.
16. Laura did an outstanding job.
17. Eye opening. We have a lot to learn.
