This was good but a bit long. She did a great job of describing the role.

I did not learn anything new.

It was a clear, thoughtful and engaging presentation that made sense.

Excellent update on what is happening with new plans.

Overall, it was fine, but I was disappointed with the option of the break-out session.

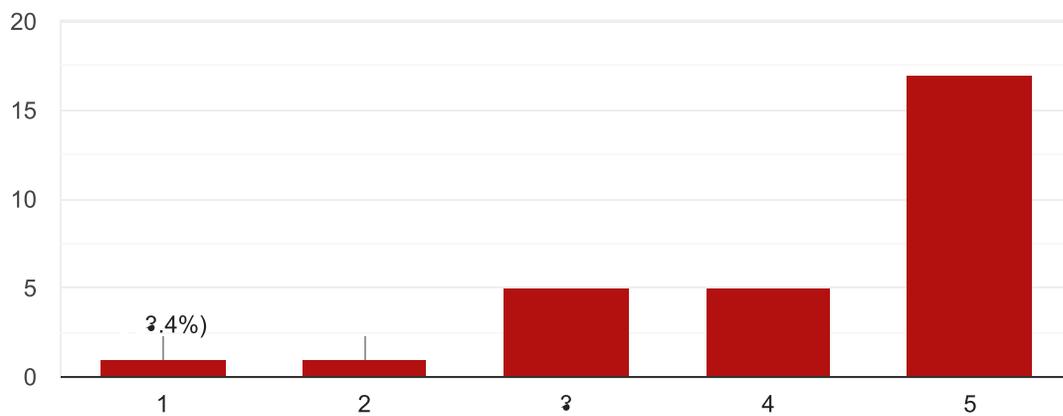

Helpful information to know.

Love the enthusiasm.

The speaker was boring and went ten minutes into the lunch hour.

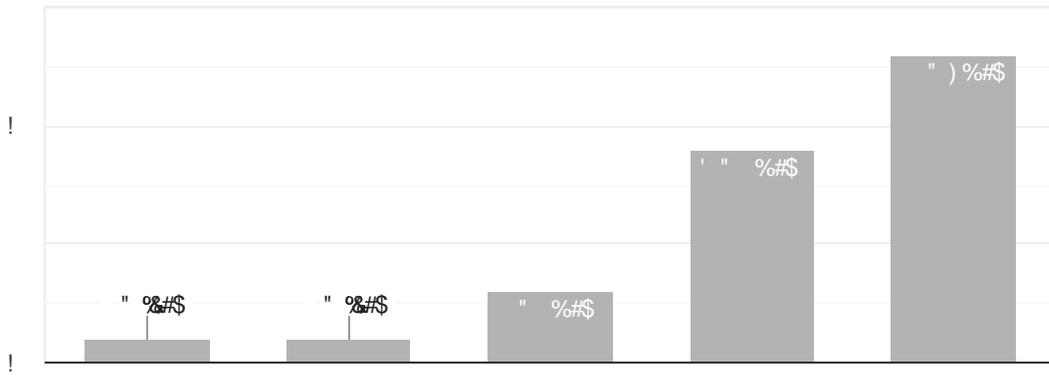

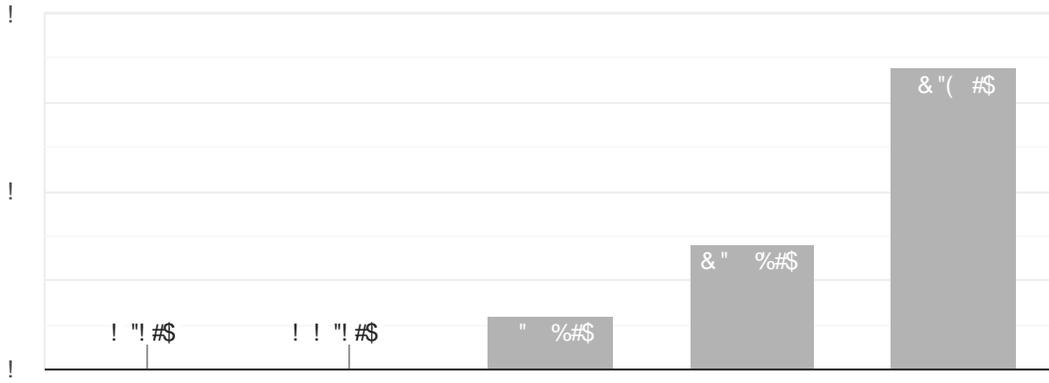

I'm looking forward to having the chance to interact with Dr. Salazar this semester when he is on campus.

Excited to go to his summit in June.

Did not attend

Overall, I liked his presentation, but I felt that some of the data presented was skewed and I thought it was misleading.

I would've been happy, hoped I would have more hands on.

I loved his one. I would've participated.

No good the first presentation we spent most of the time on what doing the training would look like and did not really get into the education.

It is nice to have the opportunity to see the Keynote speaker in the morning.

Did not have enough time and I don't think the tactic taught is the best course of action. Unfortunately the instructor is not going to be available for the instructor we have. Combat Vet

I attended the AB 705 workshop. It's not an option on this menu. All 5'.

Everyone needs this training every year. Let them know it's not enough time. It needs to be 4 hours.

See previous comment.

With we had more time to listen to his whole presentation.

The workshop that I attended didn't appear as an option above: AB 705 Impact: What Our Dads Tell Us

Can he be our Keynote Speaker?

Excellent update on current policy and relevant current information.

Again we did not have enough time, get people!

I did not attend any of these sessions. I attended the one about AB705. This presentation was confusing and I'm not sure that I understand how it will work. The presenter didn't want to answer my question which was frustrating.

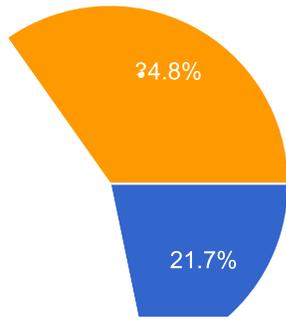

I really enjoy learning from Johnny and appreciate that he has come on his trip and thank you.

Some creative ways to connect with students. Love your bio video.

The best speaker. Everyone needs to be at this training

excellent perspective on issues in our area

This session didn't really have anything to do with my work in the classroom, but I found the presentation interesting and informative.

The Veteran in the Classroom presentation was my favorite. Very informative!

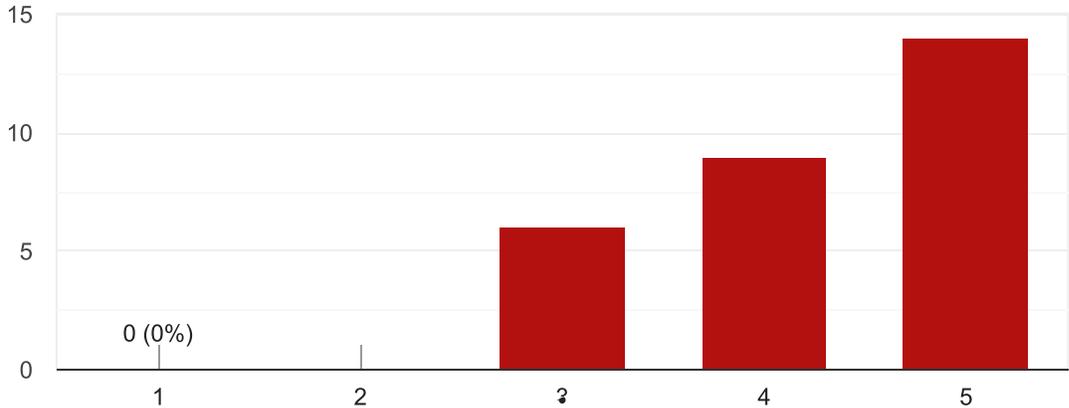

Super interesting info that I had not heard before! Would love to learn more and maybe get to present on one of our campus clubs.

Well presented. Very important issue that is too pervasive in our area. Thank you for a fabulous job.

I will be okay as long as it is guided and it appears to be

I am still concerned about PPA. Why does the process have to keep changing? It is confusing enough as it is and now then it changes every year, so I'm not sure what is happening. The process is very burdensome.
